Proteomics Informatics Course

Gaggle Exercises

Use any and all appropriate geese to explore Halobacterium proteins retrieved from annotation goose searches of the following terms. Some of the terms are intentionally truncated. Look for interesting – or puzzling – associations of the proteins across proteomics, microarrays, networks, and annotation.

1. pyruvate
2. fla
3. tryptophan
4. cobalamin
5. transport
6. ribosom
7. glutamate
