TPP Installation & Support

Luis Mendoza

Proteomics Course

October 16, 2006

INSTITUTE FOR Systems Biology

TPP Installation

- Installs on Linux and Windows systems
- Open-Source: Source code available at Sourceforge: *http://sf.net/projects/sashimi/*

LINUX

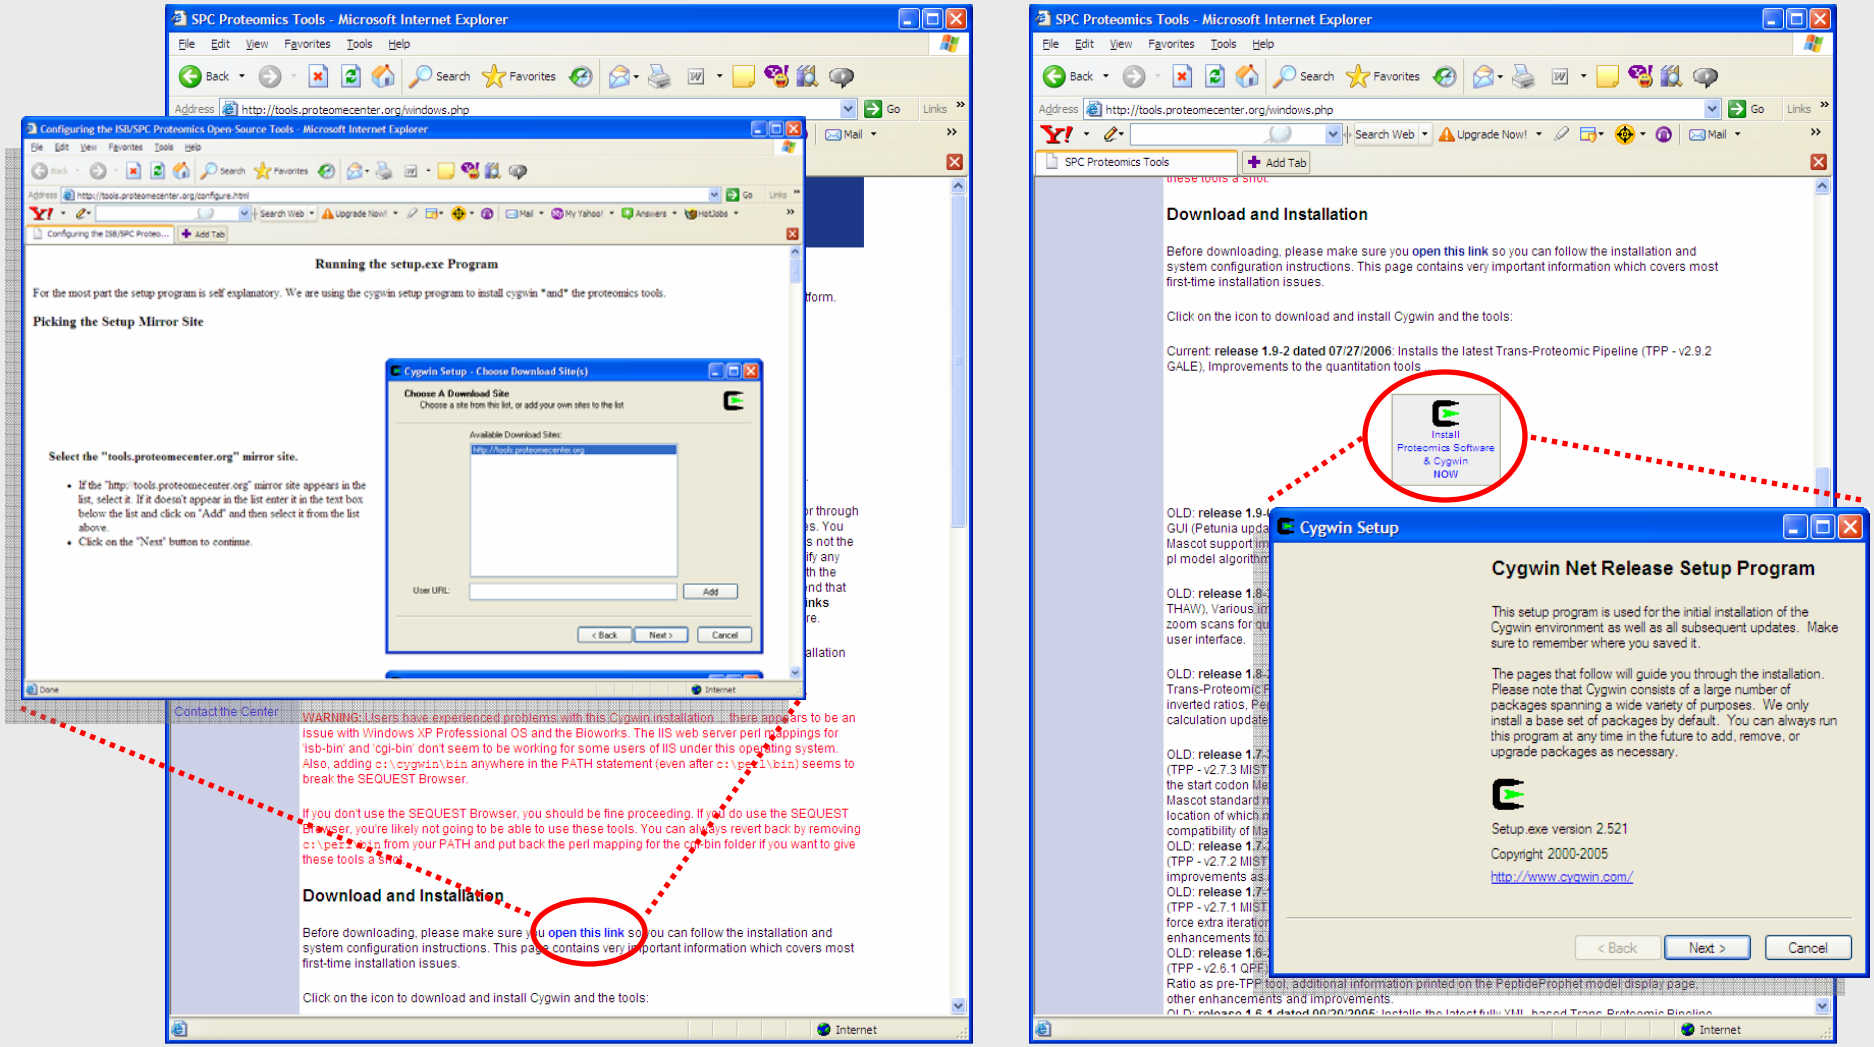
- Distributed as a tarball
- Consult the included README for build and usage instructions
- Apache web server

TPP Windows Installation

Windows

- Cygwin-based distribution
- Can use IIS (XP Pro) or Apache web server (bundled)
- Requires a one-time configuration of environment variables and web server.
- All instructions online at *http://tools.proteomecenter.org/configure.html*

TPP Windows Download



TPP Support

- Support is provided via “Google-groups” email distribution lists:

spctools-announce

- Low-volume, moderated list
- New releases, software updates, etc.

spctools-discuss

- Open forum for discussing SPC proteomics tools, asking questions, and suggesting new features
- Over 600 topics; 300+ members
- Archived at google: easy to search!
- Tip: Search first before sending a question!
